KISHORE SARAVANAN

Aspiring Java Full Stack Developer | B.E. Computer Science Engineering, 2024–2028
Coimbatore, Tamil Nadu | +91-8056484395 | kishoresaravanan511@gmail.com | linkedin.com/in/kishore-saravanan-java | github.com/kishoresaravanan511

CAREER OBJECTIVE

Motivated Computer Science Engineering student with a strong foundation in Java programming, object-oriented programming, and backend development. Passionate about building scalable software solutions while continuously enhancing my knowledge in Artificial Intelligence and Full Stack Development. Seeking an entry-level Software Engineer role where I can apply my technical skills, solve real-world problems, and contribute to organizational success while growing as a software professional.

EDUCATION

B.E. Computer Science Engineering 2024 – 2028
Dr. N.G.P. Institute of Technology, Coimbatore | CGPA: 8.1/10

Higher Secondary (Class XII) 2024
Kongu Vellalar Matriculation Higher Secondary School, Tirupur 641603 | Percentage: 90%

Secondary School (Class X) 2022
Kongu Vellalar Matriculation Higher Secondary School, Tirupur 641603 | Percentage: 90%

TECHNICAL SKILLS

- **Languages:** Java, Kotlin (Fundamentals)
- **Web Technologies:** HTML, CSS, JavaScript, React.js (Fundamentals)
- **Backend Technologies:** Spring, Spring Boot, Spring MVC, REST APIs, SOAP, JPA, Hibernate, Maven
- **Databases:** PostgreSQL, MySQL
- **Tools & Platforms:** Git, GitHub, IntelliJ IDEA, Android Studio, Postman
- **Core Subjects:** Object-Oriented Programming (OOP), Java 8+ Features, Multithreading, DBMS, Computer Networks (Fundamentals)
- **AI:** Generative AI, Prompt Engineering, AI Fluency (Anthropic)

PROJECTS

GasGuard — IoT Gas Leakage Monitoring System (Simulated)
- Built a simulated IoT gas leakage system with three alert states: Safe, Warning, and Risk.
- Engineered a rapid-rise prediction feature that detects sudden gas spikes and always raises a Warning before Risk, giving users time to react.
- Inspired by a Bengaluru gas-leak tragedy that claimed 8 lives, where no early-warning mechanism existed.
- Developed a real-time dashboard on web and mobile app with live state indicators, graph visuals, and second-by-second event logs.

Student Management System (Console-Based Java)
- Developed a menu-driven application to manage student records using Java.
- Implemented CRUD operations using Object-Oriented Programming, Java Collections Framework, and Exception Handling.
- Designed modular classes to improve code reusability and maintainability.

Jewellery Management System (Console-Based Java)
- Developed a console-based inventory and customer management system using Java.
- Applied OOP concepts, Collections Framework, and Exception Handling for efficient data management.
- Built a modular application with a user-friendly menu-driven interface.

CERTIFICATIONS

- AI Automation with Claude — Coursera
- AI Fluency — Anthropic (2026)
- Java (Basic) Certification — HackerRank (2025)
- SQL (Basic) Certification — HackerRank (2026)

ACHIEVEMENTS & EXTRACURRICULAR

- Solved 260+ coding problems on LeetCode.
- Earned Claude certifications: AI Fluency (Anthropic) and AI Automation with Claude (Coursera).
- Earned SQL (Basic) Certification from HackerRank (2026).
- Participated in graVITas, a 24-hour hackathon at VIT Vellore.
- Participated in Codenych, a 24-hour hackathon at Erode Sengunthar Engineering College.
- Continuously learning Java Backend Development, Spring Boot, and Artificial Intelligence technologies.
- Active GitHub learner with hands-on Java console application and IoT simulation projects.
